Announcing a 2022-23 Marine Resource Education Program (MREP)

The Gulf of Maine Research Institute is pleased to announce the Marine Resources Education Program (MREP) in the Greater Atlantic fishery region.

By fishermen, for fishermen, MREP provides fishermen and others with an interest in federal fisheries with an opportunity to gain insight into how fisheries data are collected and how those data lead to regulations. MREP brings together commercial, charter, and recreational fishermen with scientists, managers, and other marine resource professionals from the Atlantic coast to learn, share insights, and network in a neutral and professional setting. Participants leave the program empowered and better prepared to be a voice in federal fisheries management.

The workshop is free to selected participants and includes travel reimbursement, hotel accommodations, and meals are provided by the program. Seats are limited.

You can apply today here: <https://mrep.gmri.org/apply>.

Fisheries Science Workshop

January 10 – 12, 2023
