

Blueline Tilefish 2023 Specs Review

April 2022

Blueline Tilefish

- The current and to-be specified 2023 Acceptable Biological Catch (ABC) is 100,520 pounds
- No changes recommended by the SSC or Monitoring Committee

From Fishery Info Doc

Table 1 and Table 2. Commercial blueline tilefish landings (live weight) from Maine-Virginia, 2000-2021 (Table 1) and 2021 by state (Table 2). Source: NMFS unpublished dealer data.

1.)

Year	Pounds
2000	2,446
2001	955
2002	269
2003	7,601
2004	5,827
2005	2,031
2006	3,039
2007	21,068
2008	8,495
2009	9,626
2010	8,388
2011	8,179
2012	9,624
2013	26,781
2014	215,928
2015	73,644
2016	14,235
2017	10,734
2018	13,068
2019	22,759
2020	31,918
2021	25,288

2020/2021 Quota Monitoring

September
10, 2021

Trip limit
reduction to
300 pounds

Recreational Catch

Table 9. Recreational blueline tilefish catch (ME-VA) using VTRs (party/charter: 2015-2021, private rental: 2020) and MRIP (private/rental: 2015-2019, 2021), as well as estimates of private/rental catch using the Delphi method (Delphi – 105.16% of charter).

Year	Party (Numbers)	Charter (Numbers)	Private Rental (MRIP 2015-2019, VTR 2020 Numbers, 2021 MRIP and VTR)	Private Rental (Delphi - Numbers)
2015	12,381	2,298	4,663	2,417
2016	13,746	2,057	116,833	2,163
2017	8,735	1,632	12,122	1,716
2018	4,796	7,885	2,989	8,291
2019	3,247	7,679	4,839	8,075
2020	6,166	3,626	MRIP = 481 Private VTR = 84	3,813
2021	10,314	3,568	MRIP = 48,749 Private VTR = 343	3,752

Fishery Performance Report

- Low quota and trip limits constrain effort/landings. Blueline trip limits generally discourage directed fishing.
- Some participants can put together a directed trip by mixing blueline, goldens, and other fish – but not worth it just for bluelines

(Both Commercial and Recreational)

(500/300/0)

(3/5/7)

Fishery Performance Report

- Recreational catch estimate volatility continues to be an issue – not much faith in blueline MRIP estimates.
- Concern about commercial targeting – analysis (same issue w/Goldens)
- Improve permit/reporting outreach - HMS

SSC: Blueline Tilefish

- Mandatory reporting of recreational private boat harvests has been very low thus far. Blueline tilefish are rare in the MRIP angler intercepts and catches estimates generally have low precision.
- An operational assessment in collaboration with the Southeast Fisheries Science Center is anticipated in 2024.
- Council staff recommended no changes to the existing ABC of 100,520 lb and the SSC concurred with this recommendation.

Blueline Tilefish

- The current and *to-be specified* 2023 Acceptable Biological Catch (ABC) is 100,520 pounds
- No changes recommended by the SSC
- No changes recommended by the Monitoring Committee
 - MRIP vs private reporting vs Delphi
 - Delphi for now (charter * 1.0516)

Blueline Tilefish

- No action needed today
- 2024 Operational Assessment...
- Survey work - ongoing communications w/
