

Figure . Distribution of landings (mt) for bottom trawl trips with *Illex illecebrosus* landings greater than 4.536 mt (10,000 lbs), by ten-minute square, during 2018-2020 (left) and 2021-2022 (right). Isobaths shown are for 100 and 400 meters. Landings in ten-minute squares shown at depths < 91 m (the shoreward regulatory depth limit for *Illex* fishing) and > 400 m are incorrect fishing locations reported in the Vessel Trip Reports.
