# Summer Flounder 2024-2025 Recreational Measures 

## Monitoring Committee November 13, 2023

MID-ATLANTIC|

## MC Objectives

- Recommend 2024-2025 recreational measures under Percent Change Approach

1. Review information used to identify appropriate percent change and resulting harvest target
2. Recommend use of coastwide measures or conservation equivalency to achieve 2024-2025 harvest target, and associated measures

Column 1
2023 RHL vs expected harvest under 2022 measures

RHL greater than upper bound of expected harvest CI (RHL underage expected)

RHL within expected harvest CI
(harvest expected to be close to RHL)

RHL less than lower bound of expected harvest CI
(RHL overage expected)

Column 2
Biomass compared to target level (SSB/SSB ${ }_{\text {MSY }}$ )

## Column 3

Change in Harvest

Liberalization \% = difference between harvest estimate and 2023 RHL, not to exceed 40\%

Liberalization \% = difference between harvest estimate and 2023 RHL, not to exceed 20\%
at least target, but no higher than $150 \%$ of target

## Low

below target stock size

## Very high

greater than $150 \%$ of target

## High

at least target, but no higher than $150 \%$ of target

Low
below target stock size

## Very high

greater than $150 \%$ of target
High
at least target, but no higher than 150\% of target below target stock size

Liberalization: 10\%
Liberalization: 10\%

No liberalization or reduction: 0\%

Reduction: 10\%
Reduction: 10\%

Low Reduction \% = difference between harvest
Reduction \% = difference between harvest estimate and 2023 RHL, not to exceed 20\% estimate and 2023 RHL, not to exceed 40\%

## 2023 Recreational Measures

- Regional Conservation Equivalency
- State measures control harvest; federal measures waived
- Non-preferred coastwide measures
- Implemented in federal regulations, but waived
- 18-inches, 3 fish, May 15-Sept. 22
- Precautionary default
- "Deterrent" measures
- 20-inch TL, 2 fish, July 1-August 31

## 2023 State Measures

|  | Min. Size (in) | Bag Limit | Season |
| :---: | :---: | :---: | :---: |
| MA | 16.5 | 5 fish | May 21-September 29 |
| RI | 18 | 4 fish | May 3-December 31 |
| RI shore | 18 | 2 fish* |  |
|  | 17 | 2 fish* |  |
| CT | 18.5 |  |  |
| CT Shore sites | 17 | 4 fish | May 1-October 9 |
| NY | 18.5 |  |  |
| NJ | Slot limit 17-18 | 2 fish ${ }^{\text {b }}$ | May 2-September 27 |
| NJ | 18 | 1 fish $^{\text {b }}$ |  |
| NJ Shore site | 16 | 2 fish |  |
| NJ de bay | 17 | 3 fish |  |
| DE, MD, PRFC, VA | 16 | 4 fish | January 1- December 31 |

## $\mathrm{NC}^{c}$

15
1 fish
September 15-29
${ }^{\text {a }}$ Combined limit of 4 fish, no more than 2 at 17 inches
${ }^{\text {b }}$ NJ slot limit total possession limit of 3 fish: 2 between 17-18; 1 over 18
c NC restrictions to reduce mortality on southern flounder

## Harvest 2009-2022

## With 2023 Waves 1-4

## State vs. Federal Waters Harvest (Ib)

## Harvest (Ib) by mode

## Percent Change in Harvest Needed

 for 2024-2025- Percent Change Approach Step 1: Compare 2024-2025 RHL to 80\% confidence interval around expected 2024-2025 harvest under current (2023) measures
- Estimate and CI generated from Recreational Demand Model (RDM)
- $80 \%$ CI based on recommendation of the MC/TC from May 2023

## Percent Change in Harvest Needed

 for 2024-2025- Percent Change Approach Step 1: Compare 2024-2025 RHL to 80\% confidence interval around expected 2024-2025 harvest under current (2023) measures
- RHL is less than the lower bound of this CI

|  | Median | $\mathbf{8 0 \%} \mathbf{C I}$ | 2024-2025 <br> RHL |
| :---: | :---: | :---: | :---: |
| RDM | 8.88 | $8.10-9.48$ | 6.35 |

Column 1
2024-25 RHL vs expected harvest under 2023 measures

RHL greater than upper bound of expected harvest CI (RHL underage expected)

RHL within expected harvest CI
(harvest expected to be close to RHL)

RHL less than lower bound of expected harvest CI (RHL overage expected)

Column 2
Biomass compared to target level (SSB/SSB ${ }_{\text {MSY }}$ )

## Column 3

Change in Harvest

Very high
greater than $150 \%$ of target High
at least target, but no higher than $150 \%$ of target

## Low

below target stock size

## Very high

greater than $150 \%$ of target

## High

at least target, but no higher than 150\% of target

Low
below target stock size

## Very high

greater than $150 \%$ of target
High
at least target, but no higher than 150\% of target

## Low

below target stock size

Liberalization \% = difference between harvest estimate and RHL, not to exceed $40 \%$

Liberalization \% = difference between harvest estimate and RHL, not to exceed 20\%

Liberalization: 10\%
Liberalization: 10\%

No liberalization or reduction: 0\%

Reduction: 10\%
Reduction: 10\%

Reduction \% = difference between harvest estimate and RHL, not to exceed $20 \%$

Reduction \% = difference between harvest estimate and RHL, not to exceed 40\%

## Rec. Accountability Measures: Not Triggered for Summer Flounder

|  | Rec. <br> Harvest <br> $(\mathrm{mil} \mathrm{lb})$ | Rec. Dead <br> Discards <br> $(\mathrm{mil} \mathrm{lb})$ | Dead Rec. <br> Catch $(\mathrm{mil}$ <br> $\mathrm{lb})$ | Rec. ACL <br> $(\mathrm{mil} \mathrm{lb})$ | \% Over/ <br> Under <br> ACL |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{2 0 2 0 ^ { \mathrm { a } }}$ | 10.08 | 2.52 | 12.59 | 11.51 | $+9 \%$ |
| 2021 | 6.82 | 2.20 | 9.01 | 12.48 | $-28 \%$ |
| $\mathbf{2 0 2 2}$ | 8.63 | 2.95 | 11.58 | 14.64 | $-21 \%$ |
| Average | $\mathbf{8 . 5 1}$ | $\mathbf{2 . 5 5}$ | $\mathbf{1 1 . 0 6}$ | $\mathbf{1 2 . 8 8}$ | $\mathbf{- 1 4 \%}$ |

a 2020 MRIP harvest estimate incorporated ~19\% imputed data

## 2024-2025 Harvest Target

- Percent reduction = difference between harvest estimate and RHL, not to exceed 40\%
- Harvest estimate of 8.88 million pounds, reduced down to RHL of 6.35 million pounds $=28 \%$ reduction in harvest

## 2024-2025 Staff Recommendation

- Recommend continuation of regional conservation equivalency
- Non-preferred coastwide measures required under CE; waived in favor of state regulations
- Current: 18 inches, 3 fish, May 15-September 22
- RDM run(s) for NP coastwide measures - not yet available

# Staff Recommendation: Precautionary Default Measures 

- Status quo precautionary default measures of 2 fish, 20 inches, July 1-August 31
- MC should consider whether these will be sufficiently restrictive in all states given reduction needed

## Summary and MC Discussion

- Recommend either coastwide measures or conservation equivalency to achieve harvest target of 6.35 mil lb ( $28 \%$ reduction)
- Staff recommend using conservation equivalency
- Non-preferred coastwide measures: use RDM results to determine necessary change from current 18 in, 3 fish, 5/15-9/22
- Precautionary default: may be ok as is at 20 in, 2 fish, 7/1-8/31
