

Figure 1. *Doryteuthis pealeii* landings during 1976-2021. The 2021 landings are preliminary because not all of the state data were available as of May 3, 2022. Trimester-based quotas have been in effect since 2007.

Figure 2. NEFSC spring and fall survey relative biomass indices (stratified mean kg per tow), for *Doryteuthis pealeii*, during 1976-2021. Indices were not computed for the fall of 2017 and 2020 (due to incomplete sampling of the species' habitat and the lack of a survey due to the COVID-19 pandemic, respectively) or the spring of 2014 and 2020 (due to incomplete sampling of the species' habitat).
