### **Council and Commission Recommend Recreational Bluefish Management Measures for 2020**

ANNAPOLIS, MD – Last week, the Mid-Atlantic Fishery Management Council (Council) recommended and the Atlantic States Marine Fisheries Commission (Commission) approved new recreational fishing regulations for the 2020 Atlantic bluefish fishery from Florida to Maine. These measures, which include a 3-fish bag limit for private anglers and shore-based fishermen and a 5-fish bag limit for for-hire fishermen, represent a substantial reduction compared to the federal 15-fish bag limit that has been in place since 2000. The Commission’s actions are final and apply to state waters (0-3 miles from shore), while the Council will forward its recommendation for federal waters (3 – 200 miles from shore) to the NOAA Fisheries Greater Atlantic Regional Fisheries Administrator for final approval.

The most recent operational assessment of the Atlantic bluefish stock concluded that the stock is overfished but not experiencing overfishing. During their joint meeting in October, the Council and Commission adopted a recreational harvest limit (RHL) of 9.48 million pounds for 2020 and 2021, which is an 18% decrease compared to the 2019 RHL. Using the current regulations, the recreational sector is projected to land 13.27 million pounds, which will exceed the RHL by 28.56%. Therefore, the Council and Commission met last week to approve new recreational management measures to constrain harvest to the reduced RHL.

The Council and Commission considered several combinations of bag limits and minimum size limits, including options to set a single set of regulations for all fishing modes or different regulations for shore/private modes and the for-hire mode. Although the Council’s Bluefish Monitoring Committee recommended a coastwide 3-fish bag limit, the majority of comments from the public and Bluefish Advisory Panel (AP) members expressed opposition to this option, noting that it would have severe economic consequences for the for-hire sector, which was only responsible for 3.6% of coastwide landings from 2016 to 2018. Additionally, AP members and the public emphasized that these proposed reductions come at a challenging time for for-hire stakeholders as they are also facing new restrictions on striped bass, black sea bass, summer flounder, and scup.

After an extensive discussion and thorough consideration of public comments, the Council recommended and Commission approved a 3-fish bag limit for private and shore modes and a 5-fish bag limit for the for-hire mode. No restrictions were made to minimum fish size or seasons.

“For many years, bluefish has been one of our most abundant recreational fisheries,” said Council Chairman and ASMFC Board member Mike Luisi. “The Council and Commission are fully committed to the effective conservation and management of this stock, but we also recognize that a sudden change in regulations could have severe socioeconomic consequences for some stakeholders. After evaluating a wide range of options and considering numerous comments from the public, we feel that this approach is the most fair and effective way to achieve the necessary reduction in harvest next year.”

The Council and Commission are continuing to work on development of a rebuilding plan as part of the Bluefish Allocation and Rebuilding Amendment. Additional information and updates on this action are available at <http://www.mafmc.org/actions/bluefish-allocation-amendment>
